

PARTIAL TRANSLATION OF JAPANESE UNEXAMINED PATENT  
PUBLICATION (KOKAI) NO. 9-316403

Application No.: 8-161036

Filing Date: June 1, 1996

Publication Date: December 9, 1997

Applicant: Nitto Denko Corp.

Priority Claimed: None

1. Title of the Invention

Adhesive Sheet

2. Scope of Claims for Patent

[Claim 1] An adhesive sheet comprising an adhesive layer applied on a casting film formed by applying plastic sol or organosol, wherein the plastic sol or organosol comprises 30 to 80 parts of a macromolecular plasticizer having a weight average molecular weight of 650 to 4000 based on 100 parts of resin materials.

3. Detailed Description of the Invention (Excerpt)

[0061] By providing unevenness on the back surface of the casting film by means of applying a casting liner having depression and projection with predetermined depth or height on the surface thereof, diffused reflection on the surface of the adhesive sheet is reduced to result in reduced gloss thereof, and make the adhesive sheet inconspicuous.
